pe-riph-er-y

(click to hear the word) (pə-rīf'ə-rē)

n. pl. pe-riph-er-ies

1. A line that forms the boundary of an area; a perimeter. See Synonyms at [circumference](#).
2. The surface of a solid.
3.
 - a. The outermost part or region within a precise boundary.
 - b. A zone constituting an imprecise boundary.

[Middle English *periferie*, from Medieval Latin *periferia*, from Late Latin *peripherīa*, from Greek *periphēreia*, from *periphērēs*, *carrying around*: *peri-*, *peri-* + *pherein*, *to carry*; see *bher-*¹ in Indo-European roots.]

bev·el

(click to hear the word) (bĕv'əl)

n.

1. The angle or inclination of a line or surface that meets another at any angle but 90°.
2. Two rules joined together as adjustable arms used to measure or draw angles of any size or to fix a surface at an angle. Also called *bevel square*.

v. bev-eled or bev-elled, bev-el-ing or bev-el-ling, bev-els

v. tr.

To cut at an inclination that forms an angle other than a right angle: *beveled the edges of the table.*

v. intr.

To be inclined; slant.

[Possibly from Old French *bevel, perhaps from baif, *open-mouthed*, from baer, *to gape*, from Vulgar Latin *badāre.]

co-in-cide

[\(click to hear the word\)](#) (kō'īn-sīd')

***intr.v.* co-in-cid-ed, co-in-cid-ing, co-in-cides**

1. To occupy the same relative position or the same area in space.
2. To happen at the same time or during the same period.
3. To correspond exactly; be identical.
4. To agree exactly, as in opinion; concur. See Synonyms at [agree](#).

[Medieval Latin *coincidere* : Latin *co-*, *co-* + Latin *incidere*, *to occur* ; see **incident**.]
